

Nuance's Dragon Mobile Assistant Debuts Voice Biometric Technology

Dragon Mobile Assistant Introduces Nuance Voiceprint, the Next Level of Personalization

Burlington, Mass. – April 1, 2014 – Nuance Communications, Inc. (NASDAQ: NUAN) today announced that its Dragon Mobile Assistant app, [available free to consumers](#) on Android, now features Nuance Voiceprint biometric technology as well as an enhanced web experience and full landscape support. The intelligent, hands-free experience of Dragon Mobile Assistant just got even smarter – and much more personal.

Dragon Mobile Assistant already offers a unique and comprehensive suite of proactive features that keep users organized, productive and connected. Now, with voice biometric technology, users can use their individual voiceprint so Dragon Mobile Assistant recognizes and responds to them – and only them – providing a truly personal experience. Further, mobile device users can use their voice to awaken their device and give it a command in one shot, even if Dragon Mobile Assistant is only in the background, or the phone is locked or asleep.

In addition, Dragon Mobile Assistant now supports landscape mode. Users can now dock their device in landscape mode and interact hands-free, enhancing the Driver Mode experience. Also, the new, in-app browser experience is faster and renders more content, more efficiently. Users can even share web results with others directly from the screen.

Nuance's voice biometric technology is already in use by many of the world's largest financial and telecommunications organizations globally, as well as within mobile virtual assistant applications. Also, at the 2014 Consumer Electronics' Show, Nuance announced that its [Dragon TV platform](#) now includes voice biometrics for TVs, set-top boxes and second screen applications, creating an even more personalized TV experience through voice.

"When designing Dragon Mobile Assistant, we decided that there were a few items we could not live without," said Michael Thompson, executive vice president and general manager, Nuance Mobile. "Among those at the top of this list are personalization and security. With that in mind, we created the latest version of Dragon Mobile Assistant featuring Nuance Voiceprint – putting intelligence and simplicity at the forefront of the user experience."

Availability

Dragon Mobile Assistant leverages Nuance's renowned voice, language understanding, ambient intelligence and expressive text-to-speech to deliver a smarter personal assistant that listens, interprets and delivers a more intuitive and connected experience. Dragon Mobile Assistant is available for free in English on Google Play in the US, supporting Android 2.3 and above.
