

Nuance Brings Cloud-Based Dragon Professional Anywhere to the UK

London, UK - February 6th, 2020 - [Nuance Communications, Inc.](#) today announced the availability of its [Dragon Professional Anywhere](#) speech recognition solutions in English enabling businesses to create high-quality documentation faster and more efficiently, while reducing costs and boosting business productivity.

Dragon Professional Anywhere customers will benefit from a secure, scalable, and centrally managed AI-powered Dragon speech recognition solution ideal for remote and mobile workers. To support data privacy, the new Dragon solutions are hosted on-premise, or via E.U.-based Nuance authorised hosting partners featuring 256-bit encryption. Because patches and updates are deployed from a centralised server, users automatically have access to the latest security and performance improvements no matter where they are located. On-premise subscriptions include the Nuance Management Centre for management of users, profiles, and licenses.

Dragon Professional Anywhere also allows organisations to add industry-specific terms and formatting rules. Additional features include customisable voice commands and auto-text, and speech-based correction.

Key benefits of Dragon Professional Anywhere include:

- Smart: The latest Dragon speech recognition engine powered by deep learning technology
- Thin: Negligible computing power required through thin or virtual clients
- Flexible: Minimal installation requirements save time and IT resources
- Scalable: Centralised on-premise or partner hosting provide scalability, bandwidth and cost control.

Dragon Professional Anywhere complements Nuance's existing Dragon portfolio of solutions for Law Enforcement, Education, Accessibility, Small Business, Social Services, Financial Services, Legal, and Healthcare. The Dragon product line has evolved over more than two decades to an AI-powered professional productivity solution used by millions of people worldwide every day.

Availability

Dragon Professional Anywhere is available today in English, as well as in Swedish, German and French. Partner-hosted deployments are in multiple data centres throughout the European Union. Purchasing and pricing information for Dragon Professional Anywhere is available at <https://www.nuance.com/en-gb/dragon/business-solutions/dragon-professional-anywhere.html>
